THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

NOTICE OF ALLOWABILITY

Reasons for Allowance

The following is an examiner's statement of reasons for allowance.

It is the opinion of the examiner that the art of record (considered as a whole) neither anticipates nor renders obvious "wherein the means for controlling the strength of the magnetic field includes a microprocessor for controlling the strength of the magnetic field produced by each of the electromagnets to provide different magnetic restraining forces at selected location of the blank of sheet metal during the deformation of the blank of sheet metal" in combination with the rest of the claimed limitations set forth in claim 1, and neither anticipates nor renders obvious "disposing a plurality of electromagnets spaced about the cavity in the first die member to exert magnetic restraining forces on the blank of sheet metal for selectively restraining relative movement between the blank of sheet metal and the first die member;...varying the magnetic field of the electromagnets to provide selected magnetic restraining forces from each of the electromagnets during the deformation of the blank of sheet metal" in combination with the rest of the claimed limitations set forth in claim 11.

Hahn et al (US 5,357,779) discloses a method for forming an article wherein a plurality of electromagnets (440, 442) are used to exert magnetic restraining forces on a blank of sheet metal (532) for selectively restraining relative movement between the blank of sheet metal (532) and a first die member (20) by varying the magnetic field of the electromagnets to provide selected magnetic restraining forces from each of the electromagnets (440, 442) during the deformation of the blank of sheet metal (532) the strength is controlled to vary the magnetic

restraining forces and to provide the same restraining forces at selected locations of the blank of sheet metal. [see col. 13 lines 49-55, 63-65 & col. 14 lines 4-9, 27-30, 49-52].

Thoms et al (US 5,377,520) discloses a method for forming an article from a blank of sheet metal (8) wherein a plurality of electromagnets (23) are disposed spaced about a cavity in a first die member (7') [see FIG 5] to exert magnetic restraining forces on the blank of sheet metal until the blank of sheet metal (8) is clamped between the first die member (7') and an upper drawing frame (21') [see col. 6 lines 16-20].

The prior art neither alone nor in combination, anticipates nor renders obvious the claimed invention and no motivation is found to modify the prior art to obtain the claimed invention. There is no motivation found because Hahn et al and Thoms et al solely disclose providing a constant (unvaried) strength of the magnetic field produced by electromagnets and fail to disclose varying the strength of the magnetic field produced by each of the electromagnets to provide different magnetic restraining forces at selected locations of the blank of sheet metal. Claims 1, 3 and 6 are allowed.

Furthermore, no motivation is found to modify the method of Hahn et al with the teaching of Thoms et al to dispose electromagnets in a spaced relation about a cavity of a first die member, because such a modification would destroy the intended function of the electromagnets of Hahn et al. The electromagnets of Hahn et al control the movement of a redraw sleeve therefore modifying the placement of the electromagnets to be spaced about the cavity in the first die member would prevent the electromagnets from controlling the actuation of the redraw sleeve. In addition, there is no motivation to modify the method of Thoms et al with the teaching of Hahn et al to vary the magnetic field of the electromagnets to provide selected magnetic

Art Unit: 3725

restraining forces from each of the electromagnets during the deformation of the blank of sheet metal because the electromagnets of Thoms et al are deactivated once the blank of sheet metal is clamped between the first die member and the upper drawing frame and the relative movement between the blank of sheet metal and the first die member is controlled by the clamping pressure exerted on the blank of sheet metal by the upper clamping frame and first die member. Claim 11 is allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
